## DETAILED ACTION

### ***Priority***

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### ***Claim Objections***

Claims 5-8 are objected to as being substantially duplicative of claims 1-4. The examiner cannot ascertain any patentable distinction between these claims and claims 1-4. Further elaboration is respectfully requested.

As far as the claims recited positive limitations and as interpreted the following art rejections are made.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Nishikawa et al.

The system to Nishikawa et al discloses an optical actuator having the appropriate flexible connectors/the appropriate wires attached as required. Furthermore, wrt the resilient member, the examiner interprets such as being disclosed as noted in col. 6 lines 15-17.

With respect to claims 2 and 6, the spring wires are electrically conductive is disclosed in col. 7 lines 10-20.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited prior art is indicative of prior art systems in this environment.
